Winter 2026

Mid and South Essex
Community Collaborative

Did you know flu is a major trigger for asthma attacks?

**Want to know how to protect your child this winter?
Follow the Community Children's Asthma Nurses top tips:**

- Take your **preventer** inhaler everyday.
- Always use a **spacer** unless you have a dry powder inhaler.
- Make sure you get your **flu vaccine**.

We need a spacer to ensure the medicine gets to our lungs.

What does a "preventer" inhaler do?

1. It reduces the swelling and inflammation within the airway in the lungs.
2. This makes the airways less sensitive to asthma triggers.
3. Using it every day as prescribed, will mean you need to take your rescue (blue) inhaler less.

According to UKHSA data the flu vaccine is up to 75% effective at preventing hospital attendances due to flu.

What is good asthma control?

1. **No symptoms during the day.**
2. **No symptoms waking them at night.**
3. **Able to complete all normal activities including PE.**
4. **Little/ no need for the rescue (blue) inhaler.**

If you are worried that your child's asthma is not controlled despite preventer treatment, please visit your GP for an asthma review and why not discuss referral to the Children's Community Asthma Service.
