

# IT'S YOUR MOVE

## WOULD YOU LIKE TO LEARN HOW TO PLAY CHESS?

Starting Saturday July 29<sup>th</sup>, 9.30am to 11.00am, Witham Library has enlisted volunteers from Witham Chess Club to hold weekly classes until further notice to help teach Chess to School Children of all ages.

You can be a complete beginner or possibly someone who started, but stopped for some reason sometime ago. Our Volunteers from Witham Chess Club will teach you not only the basic moves to start playing but also offer you the opportunity to improve your ability to further understand the complexities and enjoyment of playing Chess.

There is no charge for these classes, any donations will be gratefully welcome with all monies raised recycled, initially into the purchase of additional teaching books with the intention to let each child to have a book to take home, and hopefully later purchase bespoke equipment to further enhance the children's enjoyment that playing Chess can bring.

Chess, as most know is a great way to not only exercise, but also enhance, the concentration and cognitive skills of an individual, which once obtained, it has been shown that this skill can then often easily be transferred to the processing of multiple others tasks.

Witham Library looks forward to seeing all who wish to take advantage of this opportunity to learn this wonderful game from July 29<sup>th</sup> onward.
